**Step by step**

XolidoSign Corporate

Sending Entities

Allows you to customize the sender of email and SMS messages.

Create a Sending Entity

From the menu **"Administration"** > **"Other resources"** > **Sender entities** we can create as many entities as we need.
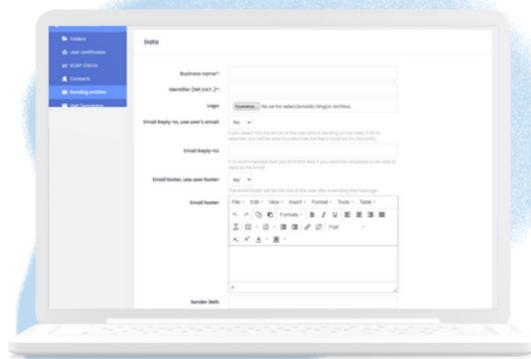

Data to create the Sender Entity

Company name, Identifier, email reply-to, logo, email footer and SMS sender.

Assign Sender Entity to user

To assign the sender entities to each user, we must do it from the **Administration area > Users > Email options.** You can assign one by default or allow them to select from those registered in the application.

The **standard sender entity** in XolidoSign Corporate, is the **owner of the service** registered in the application. The administrator will be the person in charge of registering the sender entities.
